

Monona County Public Health

11/21/18 Revision to HW Ad

Help Wanted: PUBLIC HEALTH NURSE

Are you a nurse who wants to help the people of Monona County lead active, productive, and healthy lives? Then you might be the right person for this position! This nurse will promote healthy lifestyles through community education and population health initiatives, direct care and case management services to special and diverse client populations per program protocols, and response to disease outbreaks and public health emergencies.

This is a part-time position with flexible hours, vacation, and IPERS retirement account. Requirements: Iowa Registered Nurse License in good standing. Bachelors of Science in Nursing (BSN) or BA from an accredited university preferred but not mandatory. For a complete Job Description with more qualifications and to download an application go to: Mononacounty.org under Career Opportunities.

Call Danelle at 433-1773 if you have questions. Send resume and application to Monona County Public Health, 610 Iowa Ave., Onawa, IA 51040, attention Danelle Riley, or by email to mcphfinance@mononacounty.org. Position will be open until filled.

Monona County Public Health

Position: Public Health Nurse

Summary of Practice: PHNs provide direct care and health promotion services for individuals, families and community groups in Monona County. They perform complex assessments, education, linkages to community resources, and case management services in patient homes, clinics and other community settings. PHNs provide nursing services to low income and diverse client populations. This may include services to children with special health care needs, abused/neglected children, teen parents, and families with complex social concerns. In communicable disease they are involved with prevention and intervention.

EXAMPLES OF DUTIES

Duties of Specific Programs: There are a number of specialized programs in which PHNs may provide services. PHNs may be assigned duties in multiple programs depending on the local needs.

Maternal, Child Health (MCH) Provides office and/or home visits to pregnant and postpartum women and their infants, children & families. Responsibilities include family assessment, care planning, case management, education/support, documentation, case management, and coordination of care with community providers.

Family Planning Services (FP) Provides birth control counseling, pregnancy testing, pregnancy options counseling and emergency contraception.

Learning for Life (LFL) Provides nursing consultation in the LFL Program directed toward improving health status, preventing health problems and promoting the safety and emotional well being of children.

Tuberculosis (TB) PHN provides case management services to patients with active or latent disease, care coordination, referral and follow-up, contact investigation work, medication management, ongoing physical and psychosocial assessment to individuals and families. Provides information to patients, community members and other healthcare providers regarding TB. The PHN may also participate in research projects that seek to improve the health and treatment of TB patients.

EPI Immunizations - Answer calls from providers and the public, graphically analyze immunization coverage rate and exemption data, serve on the MCCA Immunization Coalition, work with community clinics on immunization coverage improvement projects.

Disease Investigation - Works in close collaboration with other members of the disease investigation team including state Epidemiologists and Public Health Staff on disease investigations. The major area of responsibility includes performing case and outbreak investigations and coordinating department responsibilities relating to the tracking.
